Profile Summary

I'm a proficient Full Stack Web & Mobile App Developer with strong problem-solving skills and a passion for creating scalable, high-performance applications. With expertise in both web development and React Native, I build seamless digital experiences across platforms.

Skills

- Frontend (React, NextJS, React Native, Tailwind CSS)
- Backend (node JS, Express JS)
- Database (MongoDB, My SQL, Firebase)
- Programming Language (C++, JavaScript, TypeScript, Python)
- git & github
- Wordpress Theme Development

Professional Experience

SharpBd IT Solution

2025(February)-Present

Junior Web Developer (Contract Basis)

- Collaborated with the team to gather and prioritize project requirements and features.
- Worked with team members on coding, code corrections, and bug fixing.
- Contributed to the development of the company's e-commerce platform.
- Partnered with the team to troubleshoot and resolve software issues.

Work Highlight

Bhubanmajhi – Travel Agency Website

Bhubanmajhi is an all-in-one travel agency platform for booking hotels, tours, flights, and passport services.

- Hotel, tour, flight, and passport booking with real-time availability.
- Admin panel to manage bookings, customers, and services.
- Frontend built with Next.js(TypeScript) and centralized state management using Context API.
- Backend API with Express.js and MongoDB for data storage.
- Secure JWT authentication.

ZaarishKids

Zaarish Kids is an online store offering a delightful collection of baby products

- Built with WordPress + WooCommerce + Elementor
- Clean, child-friendly and responsive design
- Product filtering and easy navigation
- Secure checkout and payment integration
- Dynamic product management with admin access

Android Surveillance & Location-Based Solution

A versatile React Native app providing real-time location-based services using Firebase and MapLibre.

- Implemented taxi booking system with real-time location tracking.
- Integrated location-based features like food ordering and personalized ads.
- Used Firebase Realtime Database for data sync; planning P2P via Socket.
- Leveraged MapLibre for interactive maps and geolocation functionality.
